- **Course commences on 3rd March 2012**

SIX SIGMA BLACK BELT

Six Sigma is a business management strategy, being widely used in many sectors of industry. Six Sigma seeks to improve the quality of process outputs by identifying and removing the causes of defects (errors) and minimizing variability in manufacturing and business processes. Each Six Sigma project carried out within an organization follows a defined sequence of steps and has quantified financial targets (cost reduction or profit increase). The maturity of various types of business processes can be described by a *sigma* rating indicating its yield, or the percentage of defect-free products/services it creates/provides. Motorola set a goal of "six sigmas" for all of its operations, and this goal became a byword for the management and engineering practices to achieve it.

On observing the world wide significance gained by Six Sigma the AU TVS Centre for Quality Management, Anna University has successfully conducted 13 batches of Six Sigma Green Belt certificate Program and 2 batches of Six Sigma Black Belt Certificate Program. From the feedback from delegates and experience this Black Belt course has been evolved in its own unique way.

Program Objectives

- To imbibe Zero Defect confidence supported by the high end tools and techniques of Six Sigma methodology.
- To enable deeper understanding on the tools & techniques and to do Black Belt projects.

Resource Faculty A highly Specialized Unique Panel will provide rich knowledge from Academia & deployment skills from Companies.
