ABOUT ANNA UNIVERSITY

Anna University was established on 4th September 1978. It offers higher education in Engineering, Technology and allied Sciences relevant to the current and projected needs of the society. Besides promoting research and disseminating knowledge gained therefrom, it fosters cooperation between the academic and industrial communities.

ABOUT MIT CAMPUS

In 1949, Shri. C. Rajam, gave the newly independent India, Madras Institute of Technology, so that MIT could establish the strong technical base it needed to take its place in the world. It was merged with Anna University in the year 1978. Sixty years hence, while it continues to be a pioneer in courses that it gave birth to, it is already renowned for producing the remarkable scientific community in more nascent courses such as Instrumentation Engineering and Aerospace Engineering, etc.

ABOUT THE DEPARTMENT

The Department of Instrumentation Engineering was established in the year 1949. The core strength of the Instrumentation Engineering Department MIT Campus, Anna University is Process Control & Instrumentation. The Department had received generous funding support from DST-FIST, DST-PURSE, UGC-UPE, UGC-SAP-DRS-I and TEQIP to establish state-of-the-art Research Laboratories. The UG programme offered by the Department has been accredited by NBA for 6 years. The Department shall strive towards becoming trendsetter and a facilitator in Electronics, Instrumentation and Control Engineering for higher learning, research and consultancy.

About the FDP

The objective of this course is to provide a forum for faculty to exchange ideas on the state-of-the-art research and development and identify future research needs in this interdisciplinary emerging field. In the present course, opportunities will be provided for establishing confidence in working in the area of Industrial Automation.

To provide exposure to Wireless/IoT/Cloud based industrial automation. Resource persons will be contributing their valuable insights on the above topics. Simulation training in areas of PLC, DCS, SCADA and HMI will be provided.

Course Contents

- PLC and DCS concepts
- IEC-61131-3 based programming Techniques
- IoT Based Industrial Automation
- Robotics
- OPC UA overview
- Simulation Experience in PLC softwares
- SCADA and HMI Programming
- Protocols and its interfaces

Sessions will be delivered and handled by experts from esteemed institutions and leading automation companies namely Emerson, Mitsubishi Electric, Yokogawa etc..

Eligibility

The faculty members of the AICTE approved institutions, Research scholars, PG students and professionals from Government Organisations and Industries. Number of participants is limited to 200. There is no registration fee for the participants. Participants will be selected on first come first serve basis.

Online Platform

The entire programme will be conducted through online mode. The details of the online platform and meeting link will be communicated to the selected participants through their registered e-mail. The certificate shall be issued to those participants who have attended the programme with minimum 80% attendance and scored minimum 60% mark in the test.
