

ABOUT THE WORKSHOP

AGILITY & DATA ANALYTICS

Agile techniques seem to be the best way to create complex software involving risk, uncertainty, and changing requirements. Agile hinges on embracing and adapting to change by enabling rapid feedback cycles and evolutionary development. However, bringing agility into data analytics has been a challenge for data scientists and engineers.

This workshop will through light on what makes analytics uniquely different than application development, and how to adapt agile principles and practices to the nuances of analytics. Further on how the disciplines of data science and software development complement one another, and how these intersect in an agile project environment.

Resourse persons are from Anna University and Industry.
