The students are encouraged to improve their knowledge in major areas of research such as Power System Control, Power System Protection, Smart Grid, Distributed Energy Sources, Renewable Energy and Power System Deregulation.

BRIEF OUTLINE OF FDTP

The primary objective of the Faculty Development Training Programme (FDTP) is to provide an opportunity for young faculty members to enrich their knowledge in Electric Power Systems. FDTP will cover the topics of the subject "Power System Analysis" as per Anna University syllabus Regulations 2013.

- To model the power system under steady state operating conditions.
- To apply numerical methods to solve the power flow problem.
- To model and analyze the system under faulted conditions.
- To model and analyze the transient behavior of power system when it is subjected to a fault.

Sessions will be handled by the experts in R&D from leading Universities / Institutions and experienced faculty members of our Institution.
