THE FOURTH
IGCP588
20th - 24th May 2013

‘PREPARING FOR
COASTAL CHANGE’

Venue: Hotel GRT Grand
Chennai

Organised by
Anna University
More recently, human activities such as coastal development and agriculture have affected coastlines through deposition and erosion, and through relative sea-level rise as a result of anthropogenic climate change. As such coastal change is of considerable local and global interest, not only within the geological realm, but also in terms of socioeconomic and biodiversity impacts.

**Scientific Themes**

- **Catastrophic events** *(Storms and tsunamis)*
- **Deltas and subsidence**
- **Human adaptation to sea-level change**
- **Quaternary coastal evolution**
- **Coastal resilience**
- **Coastal resources** *(offshore windmills, renewable energy, offshore mining)*
- **Other topics in coastal Science.**

**Organising Committee**

- Dr. S. Srinivasalu
  Anna University, Chennai.
- Dr. Adam Switzer
  EOS, Singapore.
- Prof. R. Ramesh
  NCSCM, Chennai.
- Dr. Christos Gouramanis
  EOS, Singapore.
- Dr. M. P. Jonathan
  IPN, Mexico.

**Objective of the Conference:**

Coastal areas are dynamic and fast changing environments. They are home to billions of people worldwide and provide areas of unique natural importance. Over millennia, changes in relative sea level, geological processes and extreme events such as storms and tsunamis, have shaped and changed Earth’s coastlines.

**Schedule**

**Sunday, May 19, 2013**
- Morning - Pre Conference Excursion
- Evening - Ice Breaker

**Monday, May 20, 2013**
- Scientific sessions
- Conference Dinner

**Tuesday, May 21, 2013**
- Scientific sessions
- Working groups meeting
- Poster session (Evening)

**Wednesday, May 22, 2013**
- Scientific sessions

**Thursday, May 23, 2013**
- Fieldtrip to beach ridge system (Geoarchaeology)

**Friday, May 24, 2013**
- Fieldtrip to tsunami and cyclone deposits
