VISITORS AND ASSOCIATES PROGRAMME

The Crystal Growth Centre was established in 1982 by Anna University as an inter-disciplinary autonomous centre to develop crystalline materials for various technological applications through research and development. Considering the importance of crystallization of materials the University Grants Commission recognised the Crystal Growth Centre as UGC National Facility in 1990.

The main objective of the centre is to continuously upgrade the research activities and to contribute in the frontier areas of research and technology relevant to crystal growth and characterization and to facilitate manpower training in the area of Crystal Growth. The centre is also to promoting the research interests of the researchers working in various academic / research Institutions in the country through training under Visitors and Associates programme. UGC continues to support the National Facility of the Crystal Growth Centre through which Researchers / Faculty members working in National labs / Universities / Colleges carry out research activities on areas of their specific interest under the guidance of the Faculty Members / Researchers of the centre. The Centre offers M.S. (Research), M.Phil., and Ph.D. programmes.

Applications are invited throughout the year from interested Researchers / Faculty Members doing research work in the field related to Crystal Growth in various National labs / Universities / Colleges to utilize the facilities at Crystal Growth Centre. The applicant for the visitors should send a brief CV along with proposed work plan and period of visit. The applicant must be a Post Graduate in Science / Engineering / Technology related to the research activities of the Centre. The selected candidates are eligible for TA / DA as per the norms of the Anna University subject to availability of funds. To avail financial support under SC / ST Category details may be provided in the application along with support documents. The centre will also permit BE/B.Tech and Post Graduate students for their summer projects and dissertation work.
