ABOUT THE CONFERENCE

The two days National Conference on Trends in Environmental Engineering, Management and Science (TEEMS '17) aims to bring together researchers from academics, scientific laboratories, industries and policy makers related to Environmental Engineering, Management and Science under one roof to share their research outcomes. The focus of the conference is on current environmental issues in State and National level and current research techniques in water/wastewater treatment, industrial effluent treatment, air pollution management, municipal/industrial solid waste management etc.,. The Conference not only provides a platform for strengthening the environmental research, but also gives an opportunity for the participants in knowing the emerging areas of research. The Conference will include invited talks and paper presentation sessions.

CONFERENCE HIGHLIGHTS

- ❖ Persistent Organic Pollutants degradation
- ❖ Emission control techniques and air quality monitoring
- ❖ Zero Liquid Discharge Techniques
- ❖ Soil and Ground water Remediation
- ❖ Environmental Systems Modeling
- ❖ Carbon dioxide sequestration techniques
- ❖ Waste to Energy and Resource recovery
- ❖ Marine Pollution and Control
- ❖ Recent developments in Environmental Policies and Legislations

INVITATION FOR PAPERS

Prospected authors from Academic Institutes, Government Departments and Environmental Consulting Organizations are invited to submit original, unpublished research manuscripts that demonstrate current research in conference themes.
